The Military Health System Partnership for Health

The purpose of this site is to enhance communication regarding the health of our Service members and their families. The site provides information to: safeguard the health and well-being of Service members and their families, promote and sustain a healthy and fit force, prevent injuries and illness and protect the force from health hazards, and sustain world-class medical and rehabilitative care to the sick and injured anywhere in the world.

To achieve a fit and healthy military force for the United States, we have a partnership for health between the Service members who make up the force; their leaders at all levels; and health care planners and providers. The integrated efforts of these partners make the continuum of world-class health care available anytime, anywhere.

We have created this site to provide each member of the Partnership for Health ready access to the resources and information they need to understand their roles and responsibilities in obtaining and maintaining a fit and healthy force.
